OBJECTIVE

Computer Science Engineering student with hands-on experience in backend development, UI/UX design, and machine learning, seeking internship or entry-level roles in software development or data science.

EDUCATION

B.E. – Computer Science and Engineering , St. Joseph's College of Engineering Chennai, Tamil Nadu, India	Nov 2022 – May 2026 CGPA: 8.02
--	-----------------------------------

XII Std , YRTV. Matric Higher Secondary School, Sivakasi	2022	Percentage: 82.5%
---	------	-------------------

X Std , YRTV. Matric Higher Secondary School, Sivakasi	2020	Percentage: 80.8%
---	------	-------------------

SKILLS

Programming Languages	Python, C (Basics), HTML, CSS, JavaScript
Database	MySQL
Design Tools	Figma, Canva
Data & Visualization	Excel, Power BI, Matplotlib

PROJECTS

Delivery Logistics Track and Predictions	<i>Python, NumPy, Scikit-learn, Matplotlib</i>
---	--

- Built a prediction model to track lost or delayed packages using send location, weight, and size.
- Implemented ANN, Logistic Regression, and Gradient Boosting; compared accuracy across all models.

Comment Toxicity Classification using LSTM	<i>TensorFlow, LSTM, Pandas, NumPy</i>
---	--

- Developed a multi-label deep learning model using LSTM to detect toxic comment categories.
- Applied NLP techniques (tokenization, padding, embeddings); deployed with real-time inference via .h5 serialization.

Wine Quality Predictions	<i>Python, Pandas, Scikit-learn, Matplotlib</i>
---------------------------------	---

- Predicted red wine quality (0–10) using physicochemical properties like acidity and alcohol content.
- Compared Linear Regression, Random Forest, and Gradient Boosting for optimal prediction accuracy.

CERTIFICATIONS

- Introduction to MongoDB – MongoDB
- Python for Data Science, DBMS, Software Testing – NPTEL
- Data Analytics – IQmath Technologies — Ethical Hacking & Cybersecurity – Supraja Technologies
- Java Fundamentals – Oracle Academy — Foundations of UX Design – Google on Coursera

ACHIEVEMENTS

- Achieved NPTEL certification in "Python for Data Science" with a strong score.
- Designed and built a fully functional drone during an intensive week-long workshop with successful flight tests.
- Completed Data Science Workshop on Microsoft Learn and acquired certificate.
